

POINT OF SALES STSTEM

POS solutions integrate and automate your retail operations – from the Point of Sale to the back office and up and down your supply chain, we turns your business into an efficient, smoothly running operation that can recognize and adapt quickly to change.

When selecting a point of sale (POS) solution, users have a choice between stand-alone solutions and integrated solutions. They should first evaluate core and non-core components of POS systems, and assess the strengths and weaknesses of best-of-breed and integrated approaches

We offer two different points of sales system.

- **POS (stand alone)**
- **POS (Integrated with inventory and ledgers)**

POS System (Stand Alone)

A point of sale (POS) system helps retailers automate transactions. POS solutions are used in retail stores where sales associates must enter sales, purchase etc.

The point of sale screen has the following features:

- **Easy to learn** - You do not have to send your staff out for expensive training.
- **Easy to use** - Requires minimum keystrokes and the often mouse is required (but you can use it if you want).
- **Flexible** - Handles any combination of discounts, credits and sale specials in one easy transaction.
- **Rewarding** – Can Helps your staff to practice suggestion selling and tracks their sales commissions.
- **Accommodating** - If something is not in stock you can send a customer order to the purchase order system.
- **Secure** - You control who can see the profit margins and stock counts.
- **Versatile** - Prints sales slips, etc.
- **Up To Date** - Works with all the current retail devices including bar code, thermal printer and runs on any network

The point of sale has following modules:

- Daily Sales Record
- Daily Purchase Record
- Daily Expense
- Stock Record
- Barcode Prints
- Different Sales report including daily sales, monthly sales, summary, stock position, purchase detail, expenses, profit & loss print and barcode sticker printing.
- Catalogue style output with product description, stock numbers, and prices.
- Export of sales data to a spreadsheet program for further analysis
